CURRICULUM VITAE

2025

I'm a professional developer with over **12 years of professional experience** specializing in - but not limited to - web development, game development, design, database architecture and security, and small teams leadership.

My career as a developer started in the early days of the web when Flash and jQuery was all the rage. Since then I've used pretty much every framework and tech stack under the sun.

I'm well rounded, experienced, and can build pretty much anything I set my mind to. I work well in a team or as a solo developer.

This is what I bring to the table:

- Resiliency and dedication
- The ability to focus and complete tasks
- Technical expertise
- Positive and professional attitude
- Accurate scopes with realistic timelines
- **Passion about the code**
- Solid chat
- A very reasonable fear of sharks
- Creativity
- Debugging (but also, like, rebugging)
- List making skills

Dual Degree
Bachelor of Arts (BA)
Psychology & Sociology
University of Reno, Nevada
2004-2008

Officer Candidate School (OCS)
Commissioned 1LT
Logistician
Fort Benning, Georgia
2009-2011

BACKGROUND

CORE VALUES

EDUCATION

SKILLSET

Javascript, Typescript
PHP, jQuery
Python
ThreeJS

Svelte, SvelteKit
React, Preact
Vue
Solid, Astro
Next, Nuxt

MongoDB, SQL
AWS
Node, Deno
Express

Figma
Tailwind
WebComponents

Godot / GDScript
Unity
GIT

Personable
Diligent
Creative
Problem Solver
Enthusiast

FRONTEND & BACKEND & GAME DEV

SOFT SKILLS

FOUNTECH.AI

Senior Developer
<https://fountech.ai>
MARCH 2025 - JULY 2025
■ CONTRACTING

- Served as the sole frontend and backend developer, delivering rapid development cycles and ensuring timely project completion.
- Built a responsive, performant website using **Svelte** and **Tailwind**, focusing on clean UI and seamless user experience.
- Developed a custom email service integrating **Deno** runtime with the Mailchimp API, automating campaigns and improving communication efficiency.

SNOWDROP SOLUTIONS

Senior Developer
<https://snowdropsolutions.com>
AUGUST 2024 - NOVEMBER 2024
■ CONTRACTING

- Built and deployed the company's main website help page using **Astro**, focusing on fast load times and SEO-friendly static content generation.
- Optimized and enhanced core features of the primary business application developed with **Vue** and **Nuxt**, improving user experience and application performance.
- Provided consultation on database schema design and query optimization, resulting in faster data retrieval and improved application scalability.
- Identified, diagnosed, and resolved numerous front-end and back-end bugs, while refactoring code to enhance maintainability and efficiency.

THREE SUMMERS STUDIOS

Project Lead / Developer
Founded DEC 2023
🎮 Ongoing passion project.

- Solo developer for an ongoing game using the Godot Engine (**GDScript**), handling all programming, art, and sound assets.
- Created and customized shaders for 2D and 3D effects, including lighting, post-processing, and particle systems.
- Implemented efficient scene management and node hierarchies to optimize rendering performance and memory usage.
- I know this isn't necessarily related to web development, but getting into game development has made me a better and more well rounded developer overall.

METAFY

Senior Developer
<https://metafy.gg>
MAY 2022 - DEC 2023

- Added features and optimized frontend code; website built using **Svelte**, **Tailwind** and **MongoDB**.
- Collaborated with designers and backend engineers to deliver seamless and intuitive interfaces.
- Optimized application performance and ensured cross-browser compatibility for a global audience.
- Integrated APIs and third-party services to enhance platform functionality.
- Wrote clean, reusable, and scalable code, adhering to best practices and design patterns.

BEDE GAMING

Senior Developer
<https://bedegaming.com>
OCT 2020 - APR 2022

- Collaborated in creating the company's shared component library (built in **React**).
- Developed sites for German and British clients as well as their largest Canadian client, OLG.

JP MORGAN

Frontend Developer
<https://www.jpmorgan.com>
OCT 2019 - JULY 2020
■ CONTRACTING

- Developed a highly modular, JSON schema-driven single-page application (SPA) using **React**, enabling dynamic rendering of complex UI components with improved maintainability.

	- Contributed over 100,000 lines of production-quality code, consistently adhering to best practices in code style, testing, and performance optimization.
EQTR Frontend Developer https://www.eqtr.com APR 2018 - OCT 2019	- Delivered multiple high-profile, brand-aligned websites for clients including Belfry and Virgin Active, ensuring responsive design and optimal performance across devices, typically Vue and React. - Maintained and updated several legacy client projects, improving functionality, fixing bugs, and modernizing codebases to meet current web standards.
SKY Frontend Developer https://www.sky.com AUGUST 2017 - FEB 2018  CONTRACTING	- Helped develop a payment processing portal for an intrastore app using the Aurelia framework. - Wrote unit tests and fixed front-end bugs, improving application stability and user experience.
SOCIAL RUGRATS Junior Developer DEC 2015 - MAY 2017	- Developed and maintained dynamic PHP/JavaScript-driven websites, ensuring compatibility with IE9+ and major browsers. - Implemented responsive layouts using Angular 1.x and Bootstrap versions to improve mobile usability. - Collaborated with designers to convert Photoshop mockups into pixel-perfect, standards-compliant web pages.
GOOD DONE GREAT Junior Developer MAY 2013 - DEC 2015	- Developed and maintained single-page applications using AngularJS 1.x, optimizing two-way data binding for better performance. - Created custom directives and reusable components to streamline UI development.
GRAVITY JACK Junior Developer https://www.gravityjack.com NOV 2011 - NOV 2012	- Built and maintained responsive web interfaces using HTML, CSS, and JavaScript, ensuring cross-browser compatibility for Internet Explorer (which was actually quite difficult at the time). - Built websites using Knockout, jQuery and Bootstrap.
FLASH DEVELOPER Amateur Developer https://chamberacr.newgrounds.com 2008 - 2012	- I built a series of games using Flash! - Kinda cringe, but still playable!
